Education

Master of Computer Applications (MCA)

Adamas University, Kolkata

Aug 2025 – Jul 2027

CGPA: 8.66 / 10 (Up to sem II)

Bachelor of Computer Applications (BCA)

Adamas University, Kolkata

Aug 2022 – Jun 2025

CGPA: 8.91 / 10

Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, REST API Development, JWT Authentication, Socket.IO
Databases: MongoDB, MySQL, Mongoose ODM
Tools: AWS S3, Git, GitHub, VS Code, Postman, Vercel
Concepts: Data Structures and Algorithms, OOP, DBMS, System Design, Role-Based Access Control

Work Experience

Full Stack Developer Intern • Intelli EdTech (Remote)

Jan 2026 – Apr 2026

- Engineered Python automation scripts for bulk ingestion of IB, IGCSE, and AP previous-year question papers, reducing manual processing time by 65% and streamlining content operations at scale.
- Built an end-to-end OCR-based document processing pipeline to convert scanned PDFs into structured, searchable question data with text and image extraction; stored assets in AWS S3, reducing manual effort by 70–75%.
- Integrated processed question data with backend APIs and collaborated with frontend developers to ensure accurate, seamless data rendering in the UI.

Frontend Web Developer Intern • AZMTH

Mar 2025 – May 2025

- Built responsive and interactive web applications using **Next.js**, **TypeScript**, and **Tailwind CSS**, delivering modern and user-friendly interfaces.
- Improved page load performance through component optimization, code splitting, and efficient rendering techniques, enhancing overall user experience.

Projects

ExamEase — University Question Paper Management System (2024)

GitHub

- Designed and developed a full-stack web application to manage, organize, and generate university examination papers across multiple departments using Node.js, Express.js, Next.js, and MongoDB.
- Implemented JWT-based authentication and role-based access control (RBAC) for Admin, Faculty, and Department roles, ensuring secure and scoped data access.
- Automated PDF generation for finalized exam papers, reducing manual preparation time by 60% and eliminating formatting inconsistencies.

SketchSync — Real-Time Collaborative Whiteboard (2025)

Live

- Built a real-time collaborative whiteboard application enabling multiple users to draw simultaneously across devices, transforming mobile phones into wireless pen tablets using Socket.IO and React.js.
- Implemented secure, room-based session management for isolated collaborative spaces, with QR code-based room joining to reduce onboarding friction.
- Added PNG and PDF export functionality and optimized canvas rendering for smooth, hand-drawn stroke quality across varying network conditions.

PG Master — PG and Meal Management System (2025)

Live

- Developed a full-stack role-based management system for paying-guest accommodations, covering attendance tracking, expense management, meal scheduling, and payment recording; reduced manual operational effort by 70%.
- Secured user sessions using JWT authentication with httpOnly cookies, preventing XSS and CSRF vulnerabilities.
- Automated generation of monthly settlement reports with downloadable PDF exports, eliminating manual reconciliation for property managers.

Achievements

LeetCode — Competitive Programming: Solved **450+** DSA problems across arrays, trees, graphs, dynamic programming, and string algorithms.

HackerRank — Problem Solving & Programming: Earned **3-Star** badges in **Problem Solving**, **C++**, **Java**, and **Python**.
